

1 General Characteristics

Composed entirely of calcium aluminates, FONDAG[®] DG is a pre-packaged ready to use high strength dry gunite.

FONDAG[®] DG is a concrete that can be used in severe duty industrial concrete applications that may require refractory performance.

FONDAG[®] DG is recommended for concrete applications requiring rapid hardening properties, resistance to abrasion and mechanical shock, resistance to chemical attack and exposure to refractory temperatures < 2000° F.

FONDAG[®] DG does not release calcium hydroxide as a hydration product. This imparts good refractoriness, chemical resistance and eliminates the major cause of efflorescence.

FONDAG[®] DG is a very dark gray color. Colorimetry data is available on request.

FONDAG[®] DG does not contain any additives.

FONDAG[®] DG does not contain crystalline silica.
